➤ PROJECTS

1. **GeoProfiles :** Developed a React.js web app to display user profiles with interactive maps using Mapbox and external API integration (Due to security reasons I hide my API key in .env.local variable). And also i used cursor Ai and Bolt Ai to create this project efficiently.
Tech Stack: React.js, Tailwind CSS, Mapbox API, Vite, REST API

2. **ChatVerse AI :** Developed a modern AI chatbot using Next.js and TypeScript, integrated with the Gemini API for real-time conversational responses. Designed a sleek and responsive UI using shadcn/ui and Tailwind CSS. Used v0.dev for rapid UI generation and Cursor AI for efficient development. For security reasons, the Gemini API key is securely stored in .env.local.
Tech Stack: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Gemini API (Google), v0.dev, Cursor, Vercel

3. **E-commerce Platform :** Developed a full-stack e-commerce website with product management, user authentication, and secure payment processing using Next.js 15 and TypeScript. Built an admin dashboard with real-time analytics, integrated Razorpay for payments, and created a modern UI with glass morphism effects using Tailwind CSS. Implemented MongoDB database, role-based access control, and RESTful APIs for seamless product and order management.
Tech Stack: Next.js 15, TypeScript, MongoDB, NextAuth.js, Razorpay API, Tailwind CSS, Radix UI, Vercel
